BRIEF SUMMARY

I am a pre-final year Computer Science undergraduate at RNS Institute of Technology. My journey began in my freshman year when I started exploring various fields and developed an interest in UI/UX design using Adobe XD. This initial curiosity led me to web development, where I created several websites for personal projects and my college. Following this, I expanded my skill set to include freelancing in video editing and front-end web development. I am deeply passionate about learning new technologies and continually strive to enhance my expertise in these areas.
